

# SUMMER RETURNS\$

Take advantage of **HOT REBATES** this season

## ENERGY SAVER INCENTIVES

Planning a move? Building a new facility? Renovating your existing one? You could be eligible for special government rebates if you choose newer, more energy efficient electrical and lighting systems.

Let us help you choose a system that not only fits your needs but offers the advantage of cost recovery through energy savings and applicable government incentives.

## GIVE BACK AND GET PAID

Summer's high temperatures place added stress on electrical systems, and that means consumption rates soar. If you have more power than you need this summer, give back to the grid and get reimbursed.

Ask us how much you could earn when you return!

**FIND OUT WHICH REBATES YOU QUALIFY FOR**  
based on the location, size and type of your facility.
